

Skin Wellness Fluff Pulp

Skin Wellness fluff pulp uses a natural mechanism to neutralize ammonia, which helps prevent rashes and skin irritation to protect even the most sensitive skin. With our fluff pulp, you can produce safe, effective products that environmentally conscious consumers demand because our pulp is made using 100% renewable, responsibly sourced natural fibers.

Baby Diaper Products

Protecting baby's health with sensitive skin solutions.

Our innovations translate into product attributes that can set your brand apart:

5.5pH

5x

**5x more effective at
keeping skin pH in
healthy range**

3.4x

**3.4x more
ammonia capture**

40%

**40% reduction in
ammonia gas**

Fiber Innovations That Differentiate Your Brand

Advanced pH Control

Skin Wellness captures and neutralizes ammonia on the spot, helping to keep skin pH balanced in a healthy range.

Gaseous Ammonia Reduction

Skin Wellness dry fibers can absorb 3.4x more gaseous ammonia versus regular fluff pulp. This means the entire fluff core is contributing to the reduction of gaseous ammonia release.

After the product is insulted, ammonia released into the air can be reduced by up to 40%, keeping products fresher for longer.

40% reduction
in ammonia gas

Exceptional Products Consumers Demand

Healthy Skin

The ammonia neutralization effect keeps the baby's skin healthy and less likely to develop rashes and other forms of skin degradation.

Security & Protection

Parents can have peace of mind with Skin Wellness protecting baby's skin. That also means spending less time and money on rash creams and doctor visits.
